

IT SUPPORT PORTFOLIO

BIOS Hard Drive Password Security Configuration

Project Objective

Document the process of configuring a BIOS/UEFI hard drive password to enhance endpoint security and protect stored data from unauthorized access.

Step	Procedure
1	Restart the PC and enter BIOS/UEFI Setup.
2	Open the Security menu.
3	Select Hard Drive Password (HDD Password).
4	Create and confirm a password.
5	Save changes and exit BIOS/UEFI.
6	Verify that the password prompt appears when accessing the drive.

Skills Demonstrated

BIOS/UEFI administration, endpoint security, access control, hardware security configuration, and technical documentation.
