

# HELP DESK SOP TRAINING MANUAL

## Purpose

To ensure all IT support incidents are handled in a structured, consistent and professional way from logging to resolution and closure.

## Scope

This applies to Microsoft 365, network issues, hardware/software support, and user access issues.

## Step 1: Receive Incident

Capture user details, contact info, department, and issue description.

## Step 2: Log Incident

Create ticket with Incident ID, category, priority, date and time.

## Step 3: Categorize & Prioritize

Low, Medium, High, Critical based on business impact.

## Step 4: Troubleshooting

Restart device, check internet, verify login, check Microsoft 365 service status.

## Step 5: Escalation

Escalate to system admin or network team if unresolved.

## Step 6: Resolution

Apply fix such as password reset, reconfiguration, reinstall or permission fix.

## Step 7: Documentation

Update ticket with root cause, actions taken and resolution.

## **Step 8: User Confirmation**

Confirm issue is resolved before closing ticket.

## **Step 9: Closure**

Close ticket only when user confirms resolution.

## **Step 10: Preventive Action**

Provide guidance to prevent future incidents.
