

IT SUPPORT PORTFOLIO

Windows 11 Bluetooth Connectivity Troubleshooting

Objective

Demonstrate troubleshooting steps to resolve Bluetooth connectivity issues by verifying and configuring Bluetooth services in Windows.

Step	Action
1	Open Run dialog (Windows + R).
2	Type services.msc and press Enter.
3	Locate Bluetooth Support Service.
4	Open Properties.
5	Set Startup Type to Automatic.
6	Apply changes and restart the service.
7	Repeat for Bluetooth User Support Service and test connectivity.

Skills Demonstrated

Windows administration, Bluetooth troubleshooting, service management, end-user support, system diagnostics.

Expected Outcome

Bluetooth services start automatically and Bluetooth devices can be paired and connected successfully after configuration.
