

IT SUPPORT PORTFOLIO

Windows Driver Backup & Restore

Objective

Document the process of backing up installed Windows drivers before formatting and restoring them after reinstalling Windows.

Step	Description
1	Create a Drivers folder on a USB drive.
2	Open Command Prompt as Administrator.
3	Run DISM /Online /Export-Driver /Destination:E:\Drivers
4	After reinstalling Windows, open Device Manager.
5	Use Update Driver and browse to the backup folder.
6	Install saved drivers and verify devices are working.

Skills Demonstrated

Windows administration, DISM utility usage, driver backup and recovery, operating system support, IT troubleshooting.
