

IT SUPPORT PORTFOLIO

Computer Hardware & CPU Internal Components

Objective

This portfolio document demonstrates foundational IT support knowledge in identifying computer hardware components and understanding their functions inside a desktop computer system.

Hardware Components Identified

No.	Hardware Component	Function
1	Motherboard	Connects all computer components
2	CPU (Processor)	Processes instructions and calculations
3	RAM (Memory)	Temporary memory for active tasks
4	Hard Drive / SSD	Permanent storage for files and OS
5	Power Supply Unit (PSU)	Supplies power to components
6	Cooling Fan & Heat Sink	Prevents overheating
7	Graphics Card (GPU)	Handles graphics processing
8	Network Interface Card (NIC)	Provides internet/network access
9	Sound Card	Controls audio input/output
10	Optical Drive	Reads CDs/DVDs
11	CMOS Battery	Maintains BIOS settings
12	Computer Case	Protects and houses components
13	Cables & Connectors	Transfers power and data
14	Expansion Slots	Allows hardware upgrades
15	BIOS/UEFI Chip	Firmware for startup process

Skills Demonstrated

- Computer Hardware Knowledge
- IT Support Fundamentals
- PC Component Identification
- Hardware Troubleshooting Basics
- System Maintenance Knowledge
- Technical Documentation Skills

Computer Boot Process

1. Power On
2. BIOS/UEFI Initialization
3. Hardware POST Check
4. Operating System Loading
5. System Ready

Portfolio Notes

This document forms part of a professional IT Support portfolio showcasing knowledge of desktop computer architecture, hardware components, and system operations.
